**SET-UP:**

Print the counters and cut them out along the dotted lines. Print in color if possible. Multiple copies might be useful for some activities. Printing on heavier paper or card stock is recommended, as is laminating them.

It may be best to put each set in a plastic baggie to help keep them together. Numbering the bags could be useful as well, especially for randomly-selecting who gets which bag.

**USES:**

- (1) Use them as counters in math for adding and subtracting.
- (2) Use them as counters for games.
- (3) Use them for sorting.
