## **HOW TO MAKE YOUR DICE:**

Note that there are 4 styles. You don't have to make each. Make whichever ones suit your purpose.

First, these are best done on card stock. If you can laminate that before assembly, that's even better. Assemble the dice, cutting on the dotted lines and folding on solid lines. Put glue on the small tabs and assembled carefully. Once your dice set is completed, you can begin using them.

- **COLORED WORD STYLE:** The colored letters are best for a color printer. You can still add some decoration around the edges if you want.
- **COLORED BACKGROUNDS STYLE:** These definitely require a color printer. There is not a lot of room for decoration, unless you have stickers to add.
- **BOLD BLACK STYLE:** You can color in the background on the bold black color dice to add visual interest. Stickers or other designs might be welcome, too. These might be preferred if you don't have a color printer.
- **OUTLINE STYLE:** For the outline words, it was assumed you might want students to color in the words. These also work great if you don't have a color printer.

## **HOW TO USE YOUR DICE:**

- **Know Your Color Words:** Roll a die. Say the letter that ends facing up. (1+ players)
- **Know Your Color Words Challenge:** Roll a die. The first person that can say the letter gets a point/token/prize. (2+ players)
- **Know Your Vocab:** Roll a die. Say something that is that color. (1+ players)
- **Know Your Vocab Challenge:** Roll a die. The first person that says a word that is something that is that color point/token/prize. (2+ players)
- **Primary, Secondary, Other:** Roll a die. Tell if the color is a primary color, a secondary color, or neither/other. (1+ players)
- **Similar Colors:** Roll a die. Tell a color that is similar to what you rolled. Example: If you rolled blue, say sky blue, baby blue, cerulean, etc...
