# FINGER TWISTERS

# FINGER TWISTERS

## **DIRECTIONS:**

Use these spinners to play. Print them out on card stock if possible. Laminate for longer use. Brass fasteners will attach the arrows to the centers of the spinners. Extra spinner arrows are included.

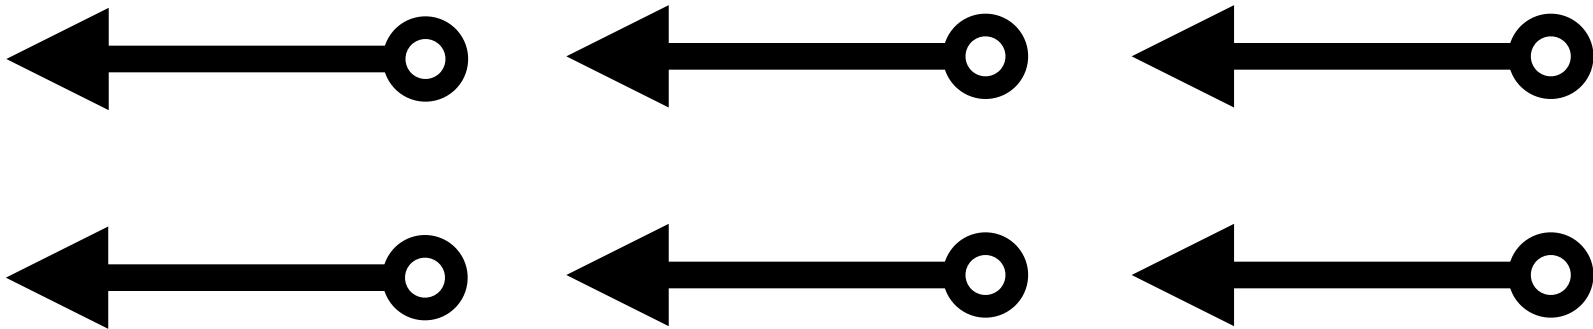

Spin one to get the color, the other to determine the finger that goes on that color.

Play one player per game board, or share a board! A player loses if they can't maintain contact with the board with all of their fingers that have been assigned a color spot to touch, or if they can't stretch their hands to reach the proper colors.

## **OPTIONAL:**

Instead of using the spinners, you can also use these chips. Print them out on card stock if possible. Laminate for longer use.

Mix them up and draw them out at random. Replace or don't replace, depending on how you want to play.
