PIZZA POGS

SET-UP:

Print the pizza pogs and cut them out along the dotted lines. Print in color if possible. Multiple copies might be useful for some activities. Printing on heavier paper or card stock is recommended, as is laminating them.

ACTIVITIES:

- (1) PIZZA TIME: Use the pizza pogs to identify fractions.
- (2) PIZZA MATCH: Match the fraction cards to the pizza pogs cards.
- (3) MORE PIZZA: Use the pizza pogs and the greater than/less than sign to make comparisons of the pizza pogs. Flip the greater than around to make it a less than. Print more than one if needed.
- (4) PIZZA MATH: Use the pizza pogs to make equations, like $\frac{1}{4} + \frac{1}{2} = \frac{3}{4}$. You can use a mixture of fractions or the numbers cards to do this.
