# DIRECTIONS:

---

To make this booklet, print the cover first. Fold it in half. This makes the cover folder. Students can put a picture or sketch of themselves on the back cover and illustrate the front cover!

Then print the next 6 pages front and back, making 3 double-sided pages. That will make the first leaf of the booklet. Tuck them inside one another and make sure the letters are in order. When they are correct, fold them and slide the leaf into the cover.

DO NOT PRINT THIS PAGE.

### NOTES:

Depending on your printer's settings, you might be better off printing all the even pages, putting them back in the tray, and then printing the odd pages on the backs.

Another, perhaps easier way, is to print all the pages single-sided. Glue two pages together. Page 2, which contains booklet pages 12 and 1, will get glued on the blank side of Page 3, which has booklet pages 1 and 11.

DO NOT PRINT THIS PAGE.
