DIRECTIONS:

There are a few clocks for a few purposes. The first is filled in, and is great practice with basic telling time. You can use the hours, minutes, and seconds if you want.

The second is blank, in case you want to fill out the hours or have students do it.

The last has blank boxes, which can be written in, or you can use the provided tiles for hours, minutes, or even roman numerals.

If you print them out on heavy paper they may last longer. Laminate if possible for better wear.

Also, clips or pins or even magnets can be used to make the hands go on better. Velcro is also a great idea for the tiles and the blank boxes page.
